The new Beechcraft **KING AIR 250**
Enhanced performance, shorter takeoffs and go-anywhere versatility.

Advanced technology delivers maximum versatility.

Building on a reputation of proven performance, the next-generation Beechcraft King Air 250 features composite winglets and lightweight composite propellers, delivering improved runway performance, range, speed and enhanced climb. Passengers travel in quintessential King Air comfort, easily moving about in the spacious square-oval cabin over long-distance journeys. The King Air 250 further defines mission reliability with a ram air recovery system that maintains peak performance when the anti-icing system is activated, resulting in a high-performance, all-weather aircraft.

ABSOLUTE POWER The flight deck is a result of continuous pilot-inspired refinement and millions of flight hours. Such excellence includes standard Rockwell Collins Pro Line 21™ fully integrated avionics, the same layout found in multimillion-dollar jets.

PEACEFUL COMMUTE The cabin of a Beechcraft King Air 250 is unlike any other in its class. Spacious, comfortable and business-friendly, the roomy square-oval cabin is also quieter, thanks to vibration absorbers mounted throughout the cabin and flight deck.
