

Introducing the all-new
for 2012 Beechcraft®
Bonanza G36 and
Baron G58.

We build
aircraft you can
believe in.

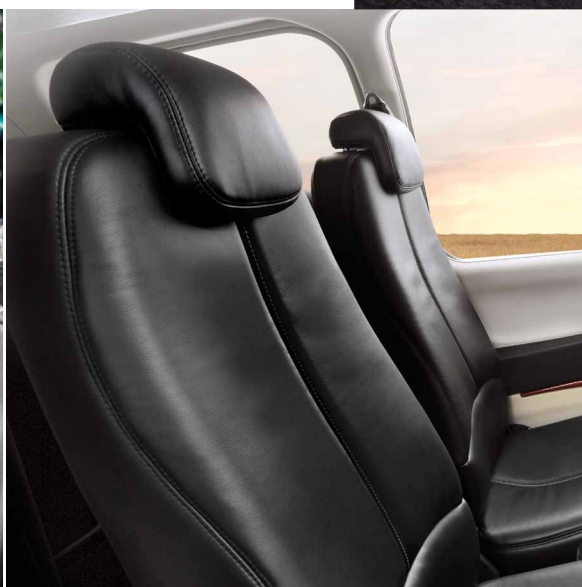

Innovative since the beginning. Reborn for tomorrow.

The all-new cabins of the Beechcraft Bonanza G36 and Baron G58 are inspired by our passion. Upscale materials feature satin metallic finishes, soft-touch surfaces and the highest-quality leather. Ergonomic seats are complemented by integrated design elements that blend and flow, eliminating sharp angles, gaps and visible fasteners. New LED ambience lighting sets a restful mood. The cockpit is also redesigned with improved seating and a redesigned power quadrant. Meanwhile, a new air conditioning system and fully automatic climate control allow for true “set-and-forget” simplicity.

A bold, all-new look, with features that include improved air conditioning and true automotive-style climate control.

- New automatic climate control system
- Air conditioning operational during takeoff
- Clean, fastener-free headliner and window reveal
- Sculpted sidewall with integrated side ledge and arm rests
- Redesigned cockpit and cabin seats
- Integrated executive table
- LED ambience lighting
- Height-adjustable cockpit seats
- Adjustable lumbar support in Cockpit and second row passenger seats
- Silver accent finishes throughout
- Redesigned power quadrant with integrated Climate System controls and hideaway cup holders

Clean.
Contemporary.
Configurable.

Sculpted forms.
Soft-touch finishes.
Smooth surfaces.

Safety and durability with new LEDs.

The latest Beechcraft Baron and Bonanza feature state-of-the-art LED exterior lights to deliver maximum lighting performance. Longer lasting and more durable than traditional incandescent lamps, light emitting diodes are brighter and require far less drain on the aircraft's electrical system, affording greater energy savings and improved safety for pilots and ground crews.
