

FLY THE FASTEST BEECHCRAFT 200 SERIES IN HISTORY 318* KNOTS!

RAISBECK+BLACKHAWK SUPER XPR52 UPGRADE

Raisbeck's *EPIC PLATINUM™* and *EPIC GOLD™* Performance Systems coupled with Blackhawk's PT6A-52 engine upgrade transform the Beechcraft 200 series into an unrivaled aircraft, enabling you to fly faster than any other, while rewarding you with reduced operating costs and more personal time. Certified and available worldwide through any Raisbeck/Blackhawk Authorized Dealer facility.

* At optimum weight, altitude and temperature

RAISBECK EPIC-BLACKHAWK SUPER XPR52 UPGRADE

RAISBECK ENGINEERING and BLACKHAWK MODIFICATIONS join forces to bring you the FASTEST Beechcraft 200 series for today's owner and operator. Experience increased speeds (**318 KNOTS**), shorter takeoff and landing, increased rate of climb, and a quieter cockpit and cabin for passenger comfort. Raisbeck's *EPIC PLATINUM™* Performance System combined with Blackhawk's -52 upgrade is available and certified worldwide for the Beechcraft 200 series today! Raisbeck's *EPIC GOLD™* is also available for serial numbers BB-1509 and subsequent; contact us for details. Receive a Pratt & Whitney new engine warranty, increased resale value, and generous core credit for time remaining on the original engines—all at a price comparable to overhaul.

ARRIVE WITH A COMPETITIVE EDGE! With Raisbeck's Quiet Turbofan Propellers, we offer you and your passengers a truly state-of-the-art flight experience in a much quieter environment. Leave the distractions behind and focus your creative energy in the sky without noisy interruptions. Or simply enjoy the cabin's peace and quiet, and arrive at your destination rested and energized. Let others deal with noise fatigue.

RAISBECK EPIC PLATINUM ELEMENTS

Raisbeck/Hartzell Quiet Turbofan Propeller System

With over 1,000 installations to date, our Quiet Turbofan Propellers have been providing 200 operators with increased performance through innovative blade and hub design. Each propeller is manufactured by Hartzell, the world leader in advanced propeller manufacturing technology.

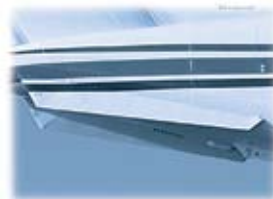

Ram Air Recovery System

The Raisbeck-patented Ram Air Recovery System maximizes the air to the engine inlet so that your engine retains the same power with ice vanes deployed that you get now with the ice vanes stowed. Your 200 will retain speed and power as you climb, or you can save fuel—all at lower engine temperatures.

Enhanced Performance Leading Edges

Our Enhanced Performance Leading Edges are an integral part to both our *EPIC PLATINUM* and *EPIC GOLD* Performance Systems. By correcting the 'droop' in the original leading edge of the 200 series wing, they provide greater lift and reduce structural fatigue on the aircraft.

Dual Aft Body Strakes

With over 25 years of proven performance, our Dual Aft Body Strakes are the ideal companion to the rest of our *EPIC* elements. Standard on Hawker Beechcraft's 350 series aircraft production line, they replace the standard ventral fin to provide 200 operators greater control and handling qualities in-flight.

High Flotation Gear Doors If HFG-equipped

Raisbeck's High Flotation Gear Doors are designed to restore standard gear climb and cruise performance, reducing drag and increasing cruise. Wheel wells, tires, wheels and brakes stay clean. Lightweight composite construction for maximum strength and durability.

BLACKHAWK -52 ENGINE UPGRADE

The Blackhawk Super XPR52 is a simple, bolt-on upgrade for the King Air 200, A200 & B200 series that requires no airframe modification. The original PT6A-41 and PT6A-42 engines are exchanged for factory-new Pratt & Whitney PT6A-52 engines—the same engines installed on the B200GT. Raisbeck's *EPIC PLATINUM* is fully compatible and includes AFMS with performance characteristics of both Blackhawk and Raisbeck upgrades.

Crown Wing Lockers (Optional)

Certified for both FAR Part 91 and FAR Part 135 operations, our Wing Lockers carry 600 lbs in 16 cubic feet of secure, watertight, external stowage space.
